Your pup has been checked for congenital deformities and is guaranteed to be in good health. However, it is suggested that you have your puppy checked by your veterinarian within 3 days after it's arrival. If your veterinarian feels the puppy is not as represented above, have your vet write a note describing the problem encountered and return the puppy with all its paperwork for a full refund of the purchase price only. This guarantee is no longer in effect after the puppy has been in its new home for more than 4 days, since from the time it leaves our premises, we have no control over its environment. However, if for any reason throughout its lifetime you are unable to keep this dog, please feel free to contact us. We will always take the dog back and find it a new home.

Both parents of this puppy have been checked, cleared and certified for hereditary issues related to hips, elbows, eyes, and cardiac. Each parent has appropriate documentation verifying these clearances and they will be included in the puppy packet. Due to the nature of these hereditary conditions, which are influenced by environmental factors as much as hereditary ones, we unable to guarantee that this pup will not develop these conditions. We can only guarantee that the pup's parents are free and clear of these conditions, thus significantly reducing the odds that these conditions might arise.

Through proper nutrition, proper exercise, and quality living conditions, you can play an important part in helping your puppy grow into a healthy adult. The puppy should be raised on a super premium, brand name nutritionally complete dog food. Grocery store brands are not recommended. [www.dogfoodadvisor.com](http://www.dogfoodadvisor.com) is an excellent website to learn and compare dog foods.

Refunds apply only to puppies returned in the first 4 days after the purchase date for failing the original vet examination.

Note: This guarantee is voided if not signed by the buyer and seller on the ownership transfer date.
